SUMMARY

I am a software engineer with 2 years of experience in designing and developing scalable enterprise web applications. I excel in high-level system design, problem-solving, and delivering high-quality solutions using JavaScript, TypeScript, and Java, with expertise in React JS and Springboot.

EDUCATION

- **Vishwakarma Institute of Information Technology** Pune, MH
Bachelor of Technology in Computer Science; GPA: 9.62 *December 2021 – June 2024*
- **K. K. Wagh Polytechnic** Nashik, MH
Diploma in Computer Technology; Percentage: 96.69% *July 2018 – August 2021*

EXPERIENCE

- **Infineon Technologies** Bengaluru, IN
Software Engineer - Fullstack *June 2024 - Present*
 - Developed fullstack product life-cycle management applications using **ReactJS** and **Spring boot** for frontend and backend development respectively.
 - Eliminated the license cost of approx. **5 million euros** by migrating PLM apps from Thingworx to ReactJS.
 - Refactored the project from mono-repository to multi-repository architecture with the help of **strangler design pattern** enabling individual PLM apps deployment.
 - Reduced the load time of frontend from **16 to 6.5 seconds** (overall **59%** improvement) using react optimization techniques.
 - Developed and maintained UI library of common react components and utilities bundled as **NPM package** to ensure code re-usability.
 - Refactored the backend code-base and moved the common **OData** services to reusable service library.
 - Scaled the PLM apps to support the user-base **3000 per day** with Openshift kubernetes platform.
- **Infineon Technologies** Bengaluru, IN
Software Engineer Intern *July 2023 - May 2024*
 - Developed a light-weight web components library using Stencil JS to support frontend application development within organization in major frontend frameworks like Angular, React and Vue JS.
 - Leveraged Storybook JS to document the web-components thoroughly. Observed usage of library by more 150 teams in organization.
 - Worked on python script to normalize file in names in batch to make them SEO friendly.

PROJECTS

- **Flat and Flatmates:** Webapp to rent flat or find flatmates with integrated google maps to plot flat locations.
 - React JS — Node JS — MongoDB
- **Codeforces problem picker:** Web browser extension to help pick random coding problem on codeforces.com platform within given difficulty range.
 - HTML — CSS — Javascript

PROGRAMMING SKILLS

- **Languages:** Javascript, Typescript, Java, Python **Technologies:** React, Spring boot, Node JS, Mongo DB

ACHIEVEMENTS

- ICPC Regionalist 2023
- Code Royal coding competition winner - CSI VIIT (Cash Prize)
- Knight on Leetcode - 1900 Rating
- 3 stars on Codechef - 1750 Rating
